

O. Kiselev, M. von Schmidt, M. Mutterer, B. Streicher, C. Rigollet, K. Yue, J.C. Zamora, S. Roy, M. Lindemulder, P. Egelhof, N. Kalantar, P. Schakel, T. Ilieva

1. Slit simulations: We have decided to use a 2 mm thick tantalum plate for the slit.
2. Shielding: we will use a 3 mm thick stainless steel (316L), which will be placed on the floor of the EXL chamber with washers in between.
3. Alpha-source insert: prices and delivery times are awaited. The source is a disk of 3cm diameter.
4. Piezo-motors: the delivery at KVI should be in week 26.
5. Cables for the second pocket are being tested at GSI. No decision has been made yet as to which type of cable is more suitable.
6. MESYTEC electronics: Mirko will ask for a quote and delivery times for extra modules.
7. Nasser mentioned the possibility of using the CsI crystals from Orsay during the experiment.

The next meeting is scheduled for Wednesday 4th of July at 13:00.
